

Assistant Project Scientist, Swartz Center for Comp. Neuroscience, UCSD

shirazi@ieee.org +1 (407) 801-0090 GitHub Profile LinkedIn: seyedyahya Work Auth: Green Card San Diego, CA

Innovative Biomedical Scientist and Engineer with over 7 years of experience in experimental design, project leadership, and data governance and analysis. Skilled in multidisciplinary research, scientific communication, and quality assurance, with a strong foundation in human physiology, signal processing and machine learning.

Technical Expertise

Signal Processing & ML: Statistical methods, feature extraction, ML algorithms (PyTorch, SciPy), with extensive use and development of Python and MATLAB tools for data analysis and visualization (Pandas, Plotly).

Biomedical Sensor Systems: Electrophysiology (ExG) analysis; motion capture; sensor design and prototyping.

Hardware Development: Sensor design, benchtop testing, prototyping, SolidWorks, Ansys, PCB design.

Research: IRB-approved human studies; project leadership; standard and specifications development.

Experience (selected, see LinkedIn for the full list)**Assistant Project Scientist** (postdoc completed 02/2024)

University of California San Diego, Institute for Neural Computation, La Jolla, CA 12/2022 – Present

- Led a multidisciplinary team on a \$6 million NIH proposal on markerless motion capture and electrophysiology.
- Led data curation and analysis for the Healthy Brain Network's massive EEG/eye-tracking dataset (7,000 subjects).
- Led standardization and data-quality efforts, including for Brain Imaging Data Structure (BIDS).
- EEGLAB developer for novel EEG, EMG, and ECoG methods, improving model accuracy for imaging applications.

Postdoctoral Scientist

New York University, Electrical and Computer Engineering, New York, NY 05/2021 – 08/2022

- Spearheaded multicenter experiments to develop functional biomarkers of fatigue, tendinopathy, and stroke.
- Led a comparative analysis of five EMG sensor technologies, enhancing sensor performance & application.

Education

University of Central Florida, Orlando, FL

Doctor of Philosophy, Mechanical Engineering with Neuroscience focus 01/2017 - 04/2021

Tehran Polytechnic, Tehran, Iran

Master of Science, Biomedical Engineering, Biomechanics 09/2011 - 02/2014

Bachelor of Science, Biomedical Engineering, Biomechanics 09/2007 - 09/2011

Patent

Shirazi S.Y., *System & methods for biosignal detection & active noise cancellation*, US Patent 2023/0240581A1.

Publications (journals and proceedings, selected, see Google Scholar for a complete list)

O'Keeffe R., **Shirazi S.Y.**, et. al. *Low-frequency Motor Cortex EEG Predicts Four Rates of Force Development*, IEEE Trans. Haptics, 2024 (PDF)

Shirazi S.Y. & Huang, H. J. *Older adults use fewer muscles to overcome perturbations during a seated locomotor task*, Journal of Neurophysiology 2024 (PDF)

Kothe C, **Shirazi S.Y.**, Mullen T., et. al. *The Lab Streaming Layer framework for synchronized multimodal recording*. BioRxiv, 2024, (PDF)

Frank G, **Shirazi S.Y.**, Palmer J., Cauwenberghs G., Makeig S., and Delorme A. *An Exploration of Optimal Parameters for Efficient Blind Source Separation of EEG Recordings Using AMICA*. The 23rd IEEE BIBE 2023 (PDF)

O' Keeffe R., **Shirazi S.Y.**, Yang J., Mehrdad S., Rao S., and Atashzar S.F. *Non-parametric Functional Muscle Network as a Robust Biomarker of Fatigue*, IEEE J. Biomed. and Health Informatics, 2023 (PDF)

O' Keeffe R., **Shirazi S.Y.**, Bilaloglu S., Bighamian R., Raghavan P., and Atashzar S.F. *Nonlinear functional muscle network based on information theory tracks sensorimotor integration post stroke*, Scientific Reports, 2022 (PDF)

Shirazi, S.Y. and Huang, H. J. *Differential theta-band signatures of the anterior cingulate and motor cortices during seated locomotor perturbations*, IEEE Trans. Neural Sys. and Rehab. Engr., 2021. (PDF)

Shirazi, S.Y. and Huang H.J., *More Reliable EEG Electrode Digitizing Methods Can Reduce Source Estimation Uncertainty, But Current Methods Already Accurately Identify Brodmann Areas*, Front. Neurosci., Nov 2019. (PDF)

Conferences (peer reviewed, selected)

Shirazi, S.Y. and Makeig S., *Recording the 3D locations of EEG scalp electrodes using an ordinary cell phone camera*, 30th Annual Meeting of the Society for Neuroscience, Washington DC, Nov 2023,

Shirazi, S.Y. and Huang H.J., *Electrocortical and motor responses to perturbations are not necessarily coupled*, 4th International Conference on Mobile Brain/Body Imaging (MoBI), La Jolla, CA, June 2022.

Outreach and Service

Outreach

Weekly EEGLAB and ExG public office hours for researchers around the world, 2023-present

PedsAcademy STEM Day for the in-patient children, Nemours Children's Hospital, May 2019

UCF STEM Day, demonstrated Biomechanics of the Muscles movement to middle-school students Oct 2018

Mentorship

Co-Advised a female Ph.D. student from Universidad Autónoma de Madrid, Spain, 2023

Mentorship of two Ph.D. candidates and two Master students at the NYU MERIIT Lab. 2021-2022

Co-mentored a UCF female freshman to present at the Society of Neuroscience Meeting, Chicago, IL, 2019

Co-mentored a UCF female sophomore to prototype a magnetic break for assistive devices, BRain Lab, 2018

Extracurricular Training

- Specialization on Generative Adversarial Networks (GANs), DeepLearning.AI
- MATLAB Academy courses on programming, data visualization, machine and deep learning
- ISO 9001:2008 quality system management auditor, IMQ Academy
- ISO 13485:2003 and Legal requirements for medical device manufacturers and distributors, Iran's FDA

Professional Membership

- Institute of Electrical and Electronics Engineers (IEEE)
- IEEE Engineering in Medicine and Biology Society (EMBS)
- IEEE Signal Processing Society (SPS)
- Society for Neuroscience (SfN)
- American Society of Biomechanics (ASB)
- International Neuroinformatics Coordinating Facility (INCF)

Relevant Skills & Experience

- Extensive track record of successfully delivering high-profile, technical projects within tight deadlines.
- Expertise in leading and mentoring high-caliber engineering and research teams.
- Proven ability in navigating fast-paced, ambiguous environments and identifying new research opportunities.
- Skilled in leading root-cause analysis experiments and effectively communicating findings to project teams.
- Exceptional writing skills in writing scientific papers, protocols, design of experiments (DOEs), FMEA, etc.
- Excellent interpersonal and communication skills, adept at coordinating activities to meet objectives on time and with high quality.
